

1. - ES.E-MYTH.COM - FRONT END

1

<http://es.e-myth.com/pub/htdocs/test>

User goes to: <http://es.e-myth.com/pub/htdocs/test>

2

The screenshot shows a web browser window with the URL <http://es.e-myth.com/pub/htdocs/test>. The browser's address bar and search bar are visible. The website header includes navigation links: "E-Myth", "Programas", "Historias de éxito", and "¿C...". Below the header, there is a greeting: "Bienvenido voice over guy (Salir)". The main content area features a section titled "RECURRING PAYMENT Chris account Test". Under this section, there is a prominent orange button labeled "Comprar ahora" (Buy now). Below the button are logos for payment methods: MasterCard, VISA, American Express, Discover, and BANK. Below this section, there is another section titled "ONE PAYMENT Chris account Test" with another "Comprar ahora" button and the same payment method logos. The word "Derechos" is visible in the bottom right corner of the page.

Jose Mtanous: Perl experts, LA... ES Admin () Create a PayPal payment butto...

▶ Step 1: Choose button type and enter payment details

▶ Step 2: Track inventory (optional)

▼ Step 3: Customize advanced features (optional)

Customize checkout pages

If you are an advanced user, you can customize checkout pages for your customers, streamline checkout, and more in this section.

Do you need your customer's shipping address?

Yes

No

Take customer to a specific page (URL) after checkout cancellation:

Ex: <https://www.mystore.com/cancel>

Take customer to a specific page (URL) after successful checkout:

Ex: <https://www.mystore.com/success>

Advanced variables

Use a line break between the variables you enter below. These variables are used to customize the checkout process.

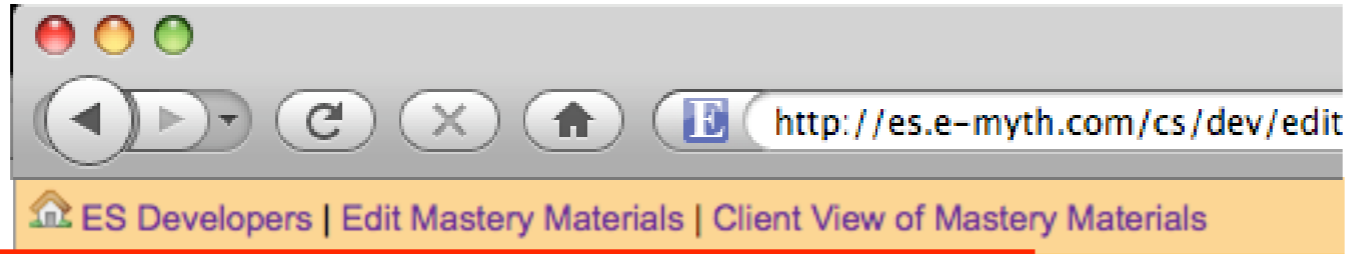

Add advanced variables

Example
address_override=1
notify_url=https://www.mywebsite.com/PayPal_IPN
business_cs_email=frank.zweitek@elomenopee.com

Create Button

Here is where we need you to program some script that can be send to a page at : es.emyth.com, the framework we use is Community Servers (<http://www.communityservers.com/>) . IS WRITTEN IN PERL.

3. - ES.E-MYTH.COM - BACK END - ARTICLE PAGE

This is where you have to create the other script with PERL that give permissions to users to acces to the courses

Admin chooses the Program

Admin enters Duration in days, it should be 365 day

Here it can says "Payment received"

What do we want you to do

1. Create a script in our backend that catch information provided from paypal.com to grant users permission to the program he or she purchased.
2. Create a script for Paypal.com backend, so paypal send it to our website backend once Credit Card Payment is processed.
